

Invitation to Attend A Conversation about OCD Followed by our 2019 Annual General Meeting

The Anxiety Recovery Centre Victoria invite you to attend our 2019 Annual General Meeting and to participate in a rare community discussion about Obsessive Compulsive Disorder (OCD).

We are pleased announce that international Psychiatrist, Dr. Leo Fontanelle, a recognized expert in the area of obsessive-compulsive, anxiety and related disorders and biological psychiatry, will be joining us along with our very own Dr. Imogen Rehm. Dr Rehm is currently an ARCVic Board Member and Fellow at SANE who continues to research and raise awareness of trichotillomania and other body-focused repetitive behaviors. We look forward to you joining us for the evening to hear from experts in the field. We welcome the opportunity to have a candid conversation about what is happening and what needs to happen with regards to OCD supports and services on the Australian front.
